With the single exception listed below, Image Inks Uvacure Series inks are not formulated with any substances found on the Canadian Chemicals Management Plan List of All Challenge Substances, Batches 1 through 12. Additionally, these substances are not known to be present in any ingredients used to make our Uvacure inks.

List of All Challenge Substances:

There is a complete List of Challenge Substances, Batches 1-12, on the following Government of Canada web site (as of 26 December 2009). The list is available as a fully searchable Excel spreadsheet.

<http://www.chemicalsubstanceschimiques.gc.ca/challenge-defi/list-eng.php>

The exception:

Nearly all Uvacure Series black inks, including process black and Pantone Mixing Black, contain the following Batch 12, substance:

Carbon Black Pigment, CAS Number 1333-86-4

Please note that CAS Number 1333-86-4 refers to the dry powder pigment with associated inhalation risk.

Sincerely,

Anthony Kurz
