This is in response to your request for a Statement Concerning FDA List of Eight Food Allergens applicable to our UVACURE HS 23 Series UV Cup Inks.

The undersigned hereby certifies that the products listed above are not manufactured to come in contact with and do not contain any ingredients derived from the following most common foods identified by the U.S. Food and Drug Administration which can result in allergic reactions:

- " Milk (or Casein)
- " Eggs
- " Soybeans
- " Wheat (or Gluten)
- " Peanuts
- " Tree Nuts
- " Fish
- " Shellfish

We further certify our products are delivered in a condition free of the stated allergens and are not responsible for adulteration of the product(s) by the purchaser or subsequent customers or end users.

Sincerely,

Anthony T. Kurz
President
Image Group

Notes: FDA's policy with respect to allergens is that products that contain an allergenic ingredient by design must comply with section 403(1)(2) of the Act, which requires each ingredient in a food to be declared. Processing aids that contain allergenic ingredients must also be declared in accordance with 21CFR101.4(a)(1). Production practices that lead to unintentional addition of allergens to food or food contact products are prohibited under section 402(a)(4) of the Act. Release agents used in processing must also be free of and not derived from the listed substances.
